Co-funded by the Intelligent Energy Europe
Programme of the European Union

Improving families' energy-efficient behaviour and use of heating and cooling systems at home

FIESTA aims to cut down households' energy consumption and related emissions, by supporting families in:

- using energy more efficiently at home, by simply readapting daily habits
- purchasing more energy-efficient heating and cooling systems
- investing in home energy production from renewable sources

Did you know?

29%

of final energy consumption takes place in the household sector

66%

of a household's utility costs is due to home heating and cooling

Lack of appropriate information and incentives is the main barrier to the improvement of energy efficiency in households

FIESTA
WILL HELP
FAMILIES:

understand

their consumption patterns

think

of available options to reduce home energy costs

act

differently at home and invest in energy efficiency and renewables

save

energy in their households

help desks

Each partner city will provide families free-of-charge with door to door assistance on home energy issues

lotteries

Families resorting to FIESTA's energy-saving services will have the opportunity to win energy-efficient products. So save and win!

BOOK YOUR
FREE-OF-CHARGE
energy audit

visit our website, book your free energy audit and start saving on your energy bills!

2100 FAMILIES

consumers' groups

Ensure energy-efficient purchase of heating and cooling systems at good value for money for families

workshops

for schools

make future generations aware of how easily energy can be saved at home

for social housing residents

help vulnerable consumers to "get more with less"

for installers & retailers

devise win-win solutions benefitting families and retailers/installers alike

FIESTA'S GOALS

134 toe/year production from renewable energy systems

500.000 € cumulative investments made by households

328 toe/year energy saving (1,130 t reduction of CO2 emissions)

30 European local authorities committing to replicate the FIESTA model
